## ACADEMIC BACKGROUND **University of California, Los Angeles (UCLA)**

**Ph.D. candidate in Machine Learning** Expected graduation: 2025  
**M.S. in Machine Learning** Sep 2019 - Jul 2021  
Co-advised by Prof. Ying Nian Wu and Prof. Song-Chun Zhu, GPA: 4.0 / 4.0

## **Beijing University of Posts and Telecommunications (BUPT)**

**B.Eng. in Computer Science** Sep 2015 - Jul 2019  
GPA: 3.9 / 4.0; Ranking: 1 / 153

**RESEARCH INTERESTS** Language Modeling, Decision-making, LLM Alignment, Multi-modal LLM

**SELECTED PUBLICATIONS** (\* denotes equal contributions)

RESEARCH **Amazon Inc - Search M5 Team**  
EXPERIENCE *Applied Scientist Intern*

Jun 2024 - Sep 2024

**Research Topic:** Multi-modality, Representation Learning, Instruction-following VLM

- Improving Instruction-following Capability of Multi-modal Embedding Models
  - Developed a multi-modal, decoder-only framework for learning representations with instruction-following capabilities.
  - Designed and implemented a two-stage training approach: a pre-training phase for modality alignment, followed by instruction fine-tuning.
  - Our method achieved SoTA performance on multi-modal information retrieval benchmarks. (In submission to ICCV 2025).

**Amazon Inc - Alexa AGI Team & Rufus Team**  
*Applied Scientist Intern*

Jun 2023 - Oct 2023

**Research Topic:** LLM Post-training, Fine-grained RLHF, Reward Modeling

- Aligning LLMs via Fine-grained Supervision and Token-level RLHF  
(**Paper published in ACL 2024**)
  - Developed a fine-grained data collection method for reward training via minimal editing, which pinpoints the exact output segments that affect user choices.
  - Proposed token-level RLHF by training a token-level reward model with fine-grained supervision and incorporated it into PPO training.
  - Our method outperformed LLaMA2-chat-7B and achieved the best performance on AlpacaFarm among all 7B models.

**UCLA, Center for Vision, Cognition, Learning and Autonomy**  
*Research assistant*

- Latent-Thought Language Models
  - Proposed a novel family of language models: Latent-Thought Language Models (LTMs) – abstract tokens that *guide* the autoregressive generation of ground tokens through a Transformer decoder.
  - Dual-rate optimization framework: fast learning of local parameters for the posterior latent tokens, and slow learning of global decoder parameters.
  - Given equivalent inference budgets, LTMs demonstrate superior sample efficiency compared to conventional autoregressive models and diffusion models.
- KokoMind: A Multifaceted Evaluation Dataset of Social Interactions
  - Developed an evaluation dataset containing 150 complex multi-party social interactions with free-text questions and answers generated by GPT-4.
  - For each social interaction, we ask questions designed to assess multiple dimensions including Theory of Mind, social norms, emotion recognition, etc.

AWARDS	<i>Doctoral Student Travel Award, UCLA</i>	2019 - 2025
	<i>Graduate Summer Research Mentorship (GSRM) Award, UCLA</i>	Jun 2022
	<i>Cross-disciplinary Scholars in Science and Technology, UCLA</i>	Jun 2018
	<i>People's Daily Scholarship, BUPT</i>	2017
	<i>First Prize Scholarship in BUPT (Top 1 in BUPT)</i>	2016 - 2018
ACADEMIC SERVICES	<b>Peer-reviewed Conferences Reviewer</b>	
	<i>Conference on Neural Information Processing Systems (NeurIPS)</i>	
	<i>The International Conference on Learning Representations (ICLR)</i>
